

## **Solar Impulse - Around the world in a solar airplane's photo.**

July 4th 2015 at 12:22am

A fantastic achievement in Aviation; - history has been made ! André Borschberg may have thought of earlier aviation pioneers like Charles Lindbergh and others as he too had to endure and battle the challenges on this flight. 8285 km from Nagoya to Hawaii across the open Pacific in 4 day 22 hours - purely on solar energy.

Congratulations to André Borschberg for this first in history, to Bertrand Piccard for your vision and earlier accomplishments on previous flights as well as to the entire Solar team! Vision, Determination and usage of modern Technologies made it possible.

A great platform for education and promotion of alternative energy.
